

Replace current claims with below Amended Claims for my patent # 09/775,528

1. A sport ball display device comprising:
- . a base
 - . with a U-shaped non-flexible design attached to the base.
 - . Wherein the U-shaped design is made of a material such as non-flexible high grade plastic or metal.
 - . the distal ends have a flat or rounded grommet attached to them, and that a sport ball can be pushed and then wedged between these two distal ends. This flat surface will also provide another good source for securing a ball in place.
-

Respectfully,

Nicholas Donofrio Jr.
